Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

A customer problem statement helps the team see the problem from the customer's point of view. The statements below describe the people who struggle with repetitive customer questions and how this makes them feel.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Priya, a customer support operations manager	Keep an up-to-date FAQ library that answers repeated customer questions	I spend hours writing and organising answers by hand	There is no fast, AI-assisted way to draft and classify FAQ entries	Overwhelmed and behind on my backlog
PS-2	A support agent	Find an existing answer quickly while helping a customer	I cannot tell which FAQ matches the customer's wording	Entries are unorganised and there is no keyword search	Frustrated and slow
PS-3	A customer or public reader	Get an answer to my question without waiting for support	I cannot find the right answer on my own	Published FAQs are hard to search and not always current	Annoyed and ignored
PS-4	A content owner	Protect our documentation from unwanted edits	Anyone might change or delete an entry	There are no permission layers over private content	Worried about losing accurate information
