Customer Journey Map

Date	16 September 2026
Team ID	SWTID-2026-3976
Project Name	AI FAQ Assistant API (AnswerBot)
Maximum Marks	2 Marks

The journey below maps how Priya (and other content creators and readers) experience the AI FAQ Assistant API stage by stage.

Phase of Journey	**Stage 1: Onboarding (Register and Login)**	**Stage 2: Creating Content (AI-assisted FAQs)**	**Stage 3: Discovery and Upkeep (Search, update, delete)**
Actions **What does the customer do?**	• Registers with name, email and password • Logs in and receives a JWT token	• Enters a topic or question • Reviews the AI-drafted question, answer and category • Saves the FAQ under a category	• Searches FAQs by keyword • Reads published answers • Edits or removes own FAQs
Touchpoint **What part of the service do they interact with?**	• POST /api/auth/register • POST /api/auth/login • GET /api/auth/profile	• POST /api/ai/generate-faq • POST /api/ai/answer • POST /api/faqs	• GET /api/faqs/search?q= • GET /api/faqs and /api/faqs/:id • PUT and DELETE /api/faqs/:id
Customer Thought **What is the customer thinking?**	• "Is my account secure?" • "Can I start quickly?"	• "Can the AI really write a usable answer?" • "Will it save me time?"	• "Can customers find this quickly?" • "Only I should change my FAQs."
Customer Feeling **What is the customer feeling?**	• Cautious, then reassured by the token-based login	• Curious and impressed by the instant draft	• Confident and in control of content quality
Process Ownership **Who is in the lead on this?**	• Authentication middleware and auth controller	• AI controller and Gemini service	• FAQ controller and search controller
Opportunities **How can we improve this stage?**	• Add email confirmation and password reset • Add social login (later phase)	• Add review/approve step for AI content • Add tags and more categories	• Add likes and answer feedback • Add analytics on popular searches
