Problem-Solution Fit Canvas

Date	17 September 2026
Team ID	SWTID-2026-3976
Project Name	AI FAQ Assistant API (AnswerBot)
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

The canvas below checks that the AI FAQ Assistant API addresses the root causes, behaviours and limitations of its target users.

1. CUSTOMER SEGMENT(S) [CS] • Customer support managers and content creators • Support agents • Customers who read FAQs	**6. CUSTOMER LIMITATIONS [CL]** • Limited time and small support teams • Free or low-cost tools preferred • No in-house AI expertise	**5. AVAILABLE SOLUTIONS [AS]** • Manual docs/wikis: full control but slow and hard to search • Generic chatbots: quick but not tied to curated FAQs • Big helpdesk suites: powerful but costly
2. PROBLEMS / PAINS + FREQUENCY [PR] • Repeated questions answered again and again (daily) • FAQs are slow to write and categorise • Hard to find the right answer	**9. PROBLEM ROOT / CAUSE [RC]** • Content is written manually • No automated drafting or classification • No secure, searchable central API	**7. BEHAVIOR + INTENSITY [BE]** • Copy-paste old answers (high) • Ask colleagues instead of searching (medium) • Skip updating docs (medium)
3. TRIGGERS TO ACT [TR] • Growing ticket backlog • Customer complaints about slow replies • Product or policy updates	**10. YOUR SOLUTION [SL]** • AI FAQ Assistant API: JWT-secured CRUD, keyword search and Google Gemini to draft answers and full FAQs in seconds	**8. CHANNELS OF BEHAVIOR [CH]** • ONLINE: API clients, web/mobile apps, Postman, email and chat with team • OFFLINE: team meetings and shared notes
4. EMOTIONS BEFORE / AFTER [EM] • Before: overwhelmed, frustrated • After: in control, confident, relieved
